

LP-V consists of 3 main applications: SLP-V, i-Label and i-View

SLP-V (Scale Link Pro-V)

SLP-V is a powerful computer-based program that integrates into new or existing computer networks using a PC server, multi-store centralized host or single P.C, providing effective store management, including product receiving, stock control, real-time sales update and analysis, and complete timely order procedures, item master changes, mark downs, sales plans. etc.

- Scale data maintenance (Add/Edit/Delete information)
PLU, Advertising messages . etc
- Production total report
- Text import/export
- Scales campaign, Batch price change
- Scheduling functions . etc

i-Label

i-Label create eye-catching labels. This easy-to-use Windows based software allows you to create in-store labels locally or from a remote location like your store headquarters.

- Label format edition
- Logo image registration
- Works with various labels and Ishida's patented label with perforated coupon to offer special in-store promotional opportunities.
- Supports multiple logos for each PLU
- Various character sizes that can be freely italicized, underlined, reversed and bolded

i-View

i-View features innovative remote scale diagnostics for your store, providing secure operation and consistent service.

- Scale status monitoring illustrates memory capacity, thermal head status, and more
- Error reports at scale to assure system and data integrity
- Data and scale configuration back up/ restore
- Scale firmware upgrades for up-to-date scale operating system
- Quick price and markdown change feature
